

AI4ALL CASE STUDY

Custom LMS

The Challenge

AI4ALL is a U.S.-based nonprofit dedicated to increasing diversity and inclusion in AI education, research, and policy. As of August 2021, their programs and alumni outreach had impacted over 15,000 people across all 50 states and worldwide. True to their mission, AI4ALL was rapidly expanding to reach learners of all ages—educators, high school and college students, and even children and young adults. However, their out-of-the-box LMS could not scale or adapt to this growth. It lacked the customization needed to support diverse learning paths and a larger audience. To achieve their goals and expand their flagship Open Learning program, AI4ALL needed a flexible, customizable LMS capable of growing alongside their mission.

The Solution

To address their challenges, AI4ALL partnered with KMI, who transformed classroom materials into engaging online learning through a customized, white-label LMS that reflected AI4ALL's brand. The platform streamlined student intake with pre-set forms, integrated Google Drive resources, and provided the scalability needed to grow alongside AI4ALL's expanding reach.

The Outcome

KMI's white-label, customizable LMS streamlined AI4ALL's student experience from registration through course completion. To date, AI4ALL has reached about 750 teachers—each impacting an average of five students—and continues to use the platform to advance its mission.
